Waste Neutral Events

Bioneers, Aquarium Gala, Ecofest, University of Maryland Sustainable Careers Expo

Well managed recycling and composting services will enhance the profile of your event and lower disposal costs. Thousands of parties and events are hosted each year in our city that while fun and memorable will also generate an extraordinary amount of food and other waste, as well as consume large amounts of energy and resources. Party throwers can reduce their environmental impact by purchasing sustainable food and products, recycling and composting, and reducing their energy needs.

K-L Group Waste Neutral Event Services:

1. Facilitate the purchase of sustainable food and products for Convention, Gala and Conference -related events.
2. Set up recycling and composting programs for event waste.
3. Aid event planners in reducing their energy and resource consumption.
4. Devise a recycling plan aimed at maximizing collection and reducing contamination -- keep recyclables separated as much as possible from other non-recyclable trash.
5. Use a 3-bin system for food waste, recycling and other trash. Recycling will be greater if visitors face identical choices at each location.
